Summary

Frontend Developer with extensive experience in ReactJS, React Native, NextJS14, and Tailwind CSS. Proven track record in creating responsive and user-friendly web applications, demonstrated through projects at The Barback Saas and Space Nasser. Looking to leverage skills to turn design wireframes into high-performing code and collaborate effectively.

Skills

- **Language skills:** Portuguese (C2 - Native), English (C1), Spanish (B2)
- **Programming Languages:** JavaScript ES6+, TypeScript, Python, PHP
- **Web Development:** Responsive Design, Web Development Best Practices
- **Front-End Development:** ReactJS, NextJS15, Styled-Components, Framer-Motion, Tailwind CSS, HTML5, CSS
- **Back-End Development:** NodeJS, Express.js
- **Mobile:** React Native, Ionic
- **Database:** PostgreSQL
- **Tools & Frameworks:** Tailwind, Rest APIs
- **Version Control:** Git, Git Lab

Work Experience

Fullstack Developer (Freelancer)

Aug 2022 - Present

Fullstack Developer Nextjs - Reactjs - Nodejs

Remote

- Developed fullstack web applications using Next.js (with Server Side Rendering and Server Actions) and React.js to create dynamic and responsive user interfaces, enhancing user experience and engagement.
- Integrated Node.js and PostgreSQL for backend development, ensuring high performance and efficient database management, optimizing query performance, and reducing latency.
- Designed and implemented modular layouts and interactive user interfaces, leveraging best practices in UI/UX design to deliver visually appealing and user-friendly applications.
- Implemented CI/CD pipelines for automated testing and deployments, ensuring continuous integration and delivery, minimizing downtime, and enhancing the development workflow.

Fullstack Dev. Space Nas'ser (Contract Project)

NextJS and React Developer

Portugal

- Developed dynamic and responsive web applications using Next.js, React.js, Framer-Motion, and Tailwind CSS, ensuring cross-browser compatibility and enhanced user experience.
- Collaborated with design teams to transform mockups into functional and visually consistent features, maintaining high standards of UI/UX design.
- Ensured compliance with web standards and optimized performance across various devices, resulting in improved load times and user interaction.
- Leveraged Vercel for deployment, ensuring high availability, scalability, and performance for web applications.

The Barback Saas

Fullstack developer

Portugal

- Developed server and client components using Next.js 14, styled with Tailwind and Shadcn, which improved the application's visual consistency and user interface
- Implemented a serverless backend with Supabase, enhancing application performance and scalability, resulting in faster load times and improved user experience.
- Utilized Next.js 14, React 18, TailwindCSS, Shadcn, and Vercel Analytics to build a responsive and user-friendly application, adhering to web development best practices, which led to increased user engagement and satisfaction.

Education

Federal University of Tocantins

Jan 2011 - Jan 2017

Bioprocess and Biotechnology Engineering

Brasil

Open University

Jun 2022 - Jul 2026

Software Engineering

Portugal

Certifications

- **Frontend Developer:** Frontend Development with html, css, js and react
- **React18, next13 and NodeJS:** Development frontend and backend with Next.js and NodeJ
